

Q2: Fine tune the model and use it in web-extension and verify the result genrated based on the training.

Answer:

Fine tuned dataset generated from API.testleaf.com

Screenshot of the Testleaf API Fine-tuning interface. The browser address bar shows `https://api.testleaf.com/finetuning`. The left sidebar contains navigation links: Usage, Cost, Keys, Fine-tuning (selected), and Storage. The main content area is titled "FINE-TUNE" and includes a "Create" button. A table lists the fine-tuning job:

Job ID	Status	Created At
ft:gpt-4o-mini-2024-07-18:testleaf-2:DXraLODt	Successful	2026-04-23 22:18:24 PM

Below the table, a "Messages" section displays a log of events:

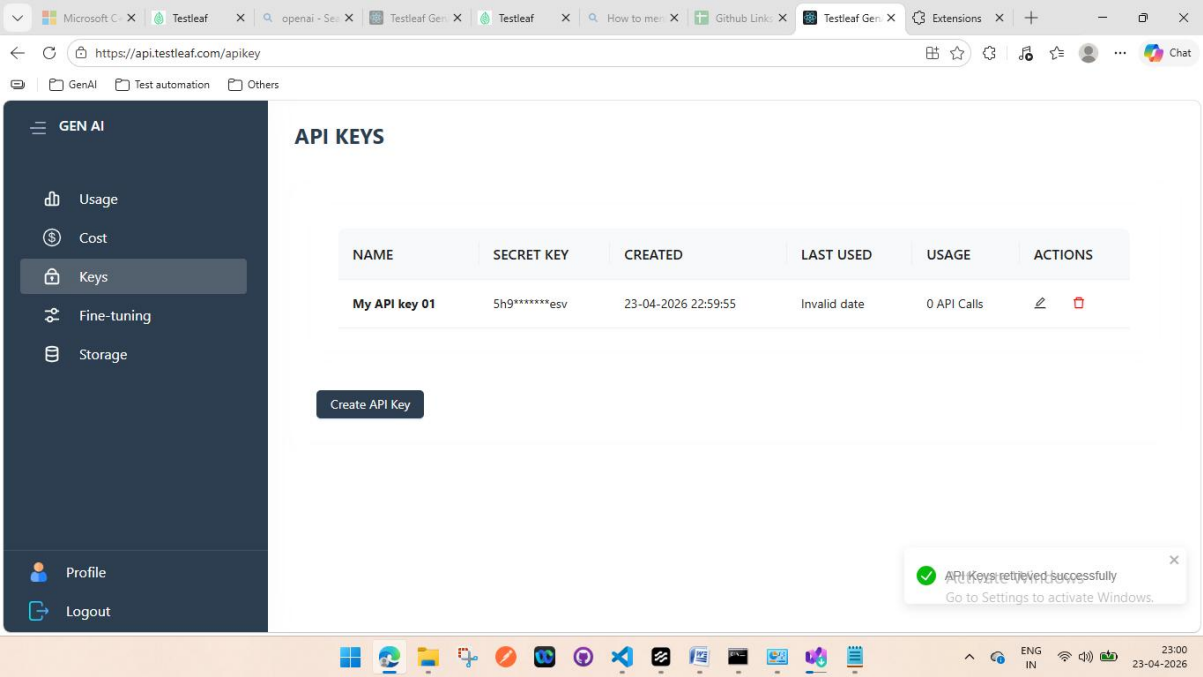

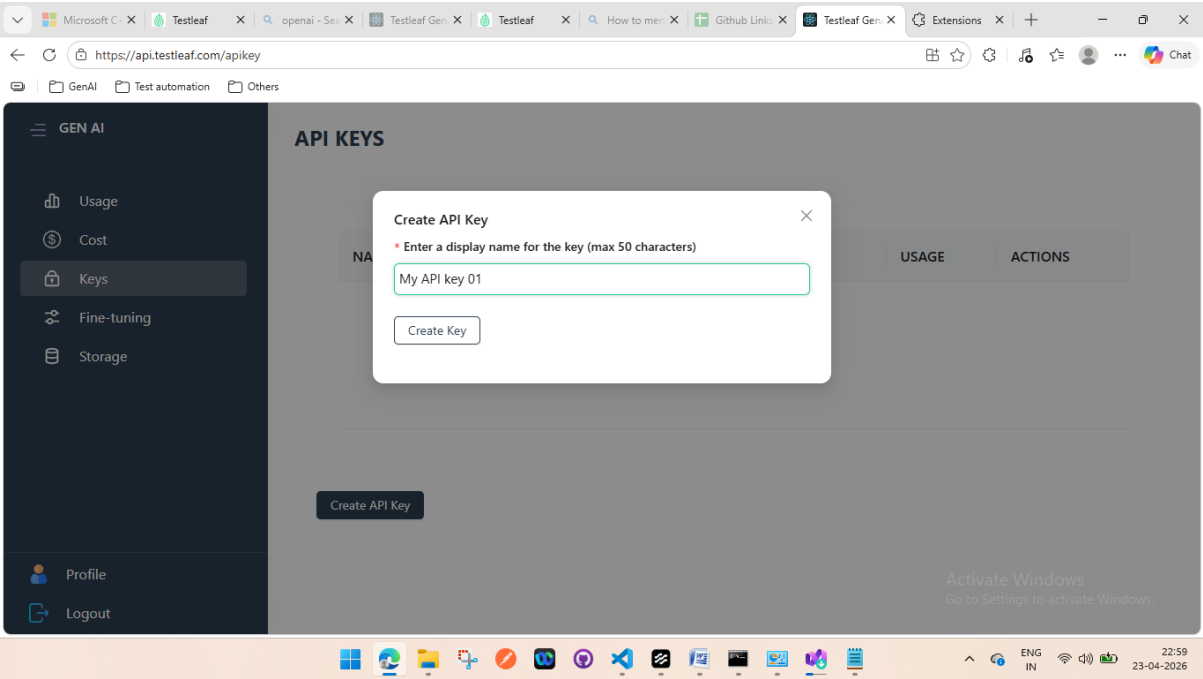

- 22:35:06 - The job has successfully completed
- 22:35:02 - Usage policy evaluations completed, model is now enabled for sampling
- 22:22:58 - Evaluating model against our usage policies
- 22:22:58 - New fine-tuned model created

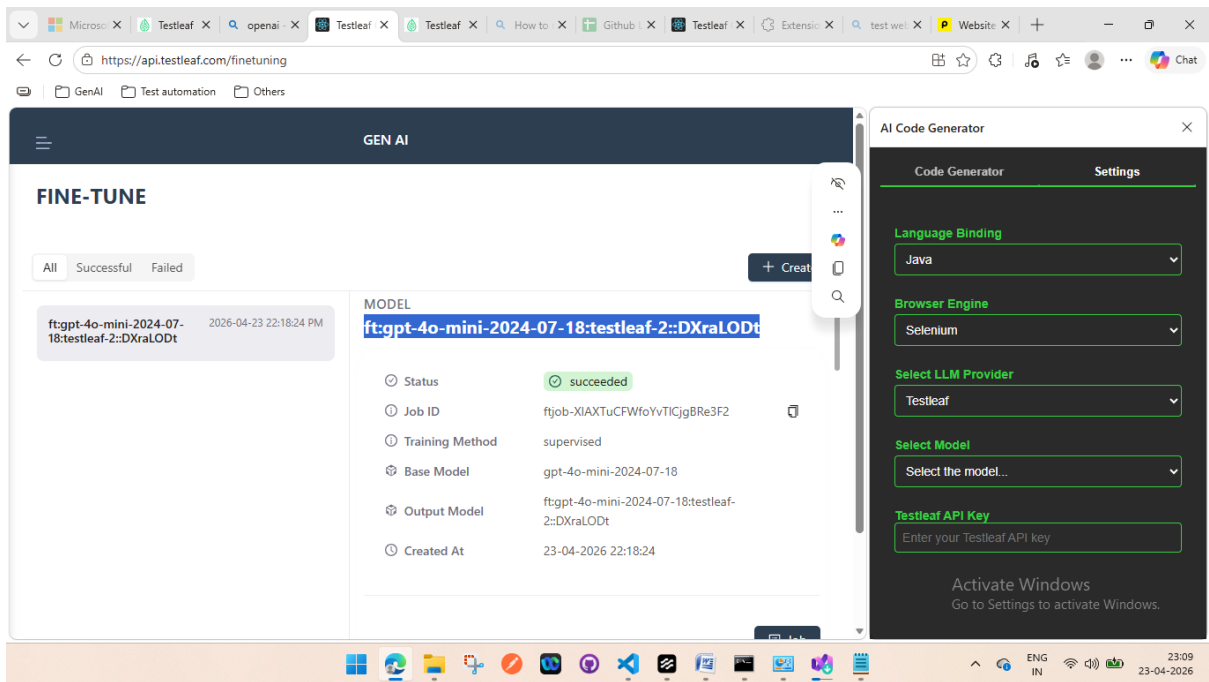

The Windows taskbar at the bottom shows the time as 22:53 on 23-04-2026.

Screenshot of the Testleaf API Keys interface. The browser address bar shows `https://api.testleaf.com/apikey`. The left sidebar contains navigation links: Usage, Cost, Keys (selected), Fine-tuning, and Storage. The main content area is titled "API KEYS" and includes a "Create API Key" button. A table lists the API keys:

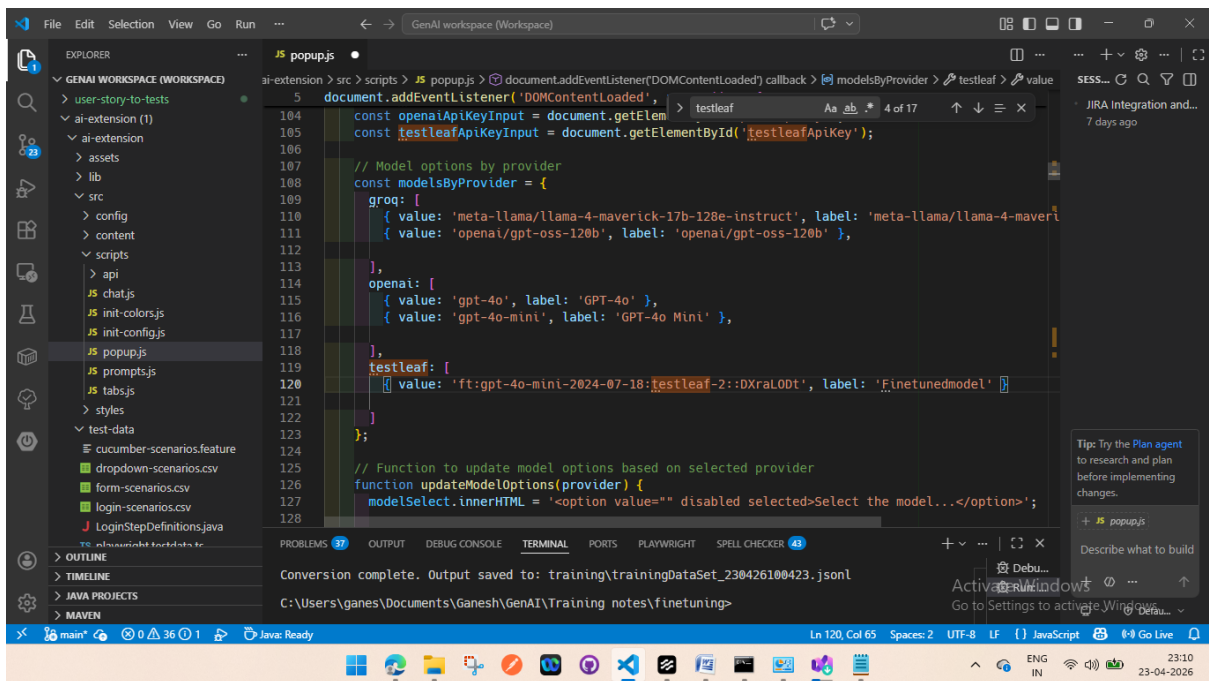

NAME	SECRET KEY	CREATED	LAST USED	USAGE	ACTIONS
No data					

The Windows taskbar at the bottom shows the time as 22:59 on 23-04-2026.

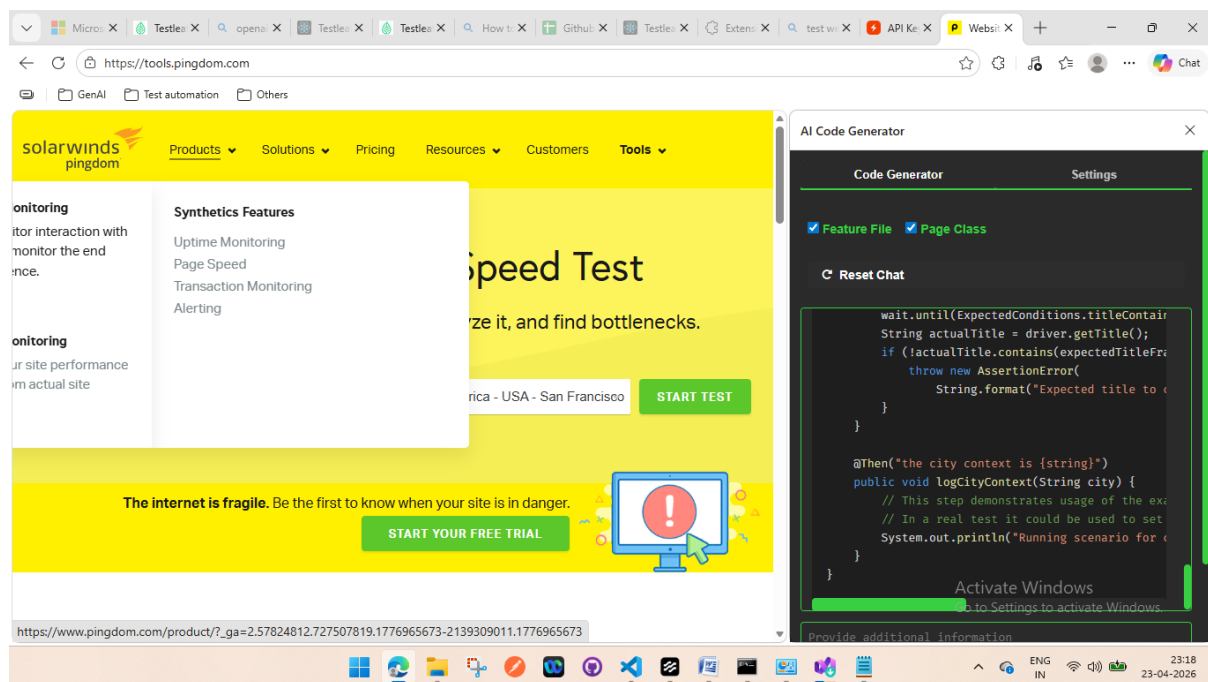

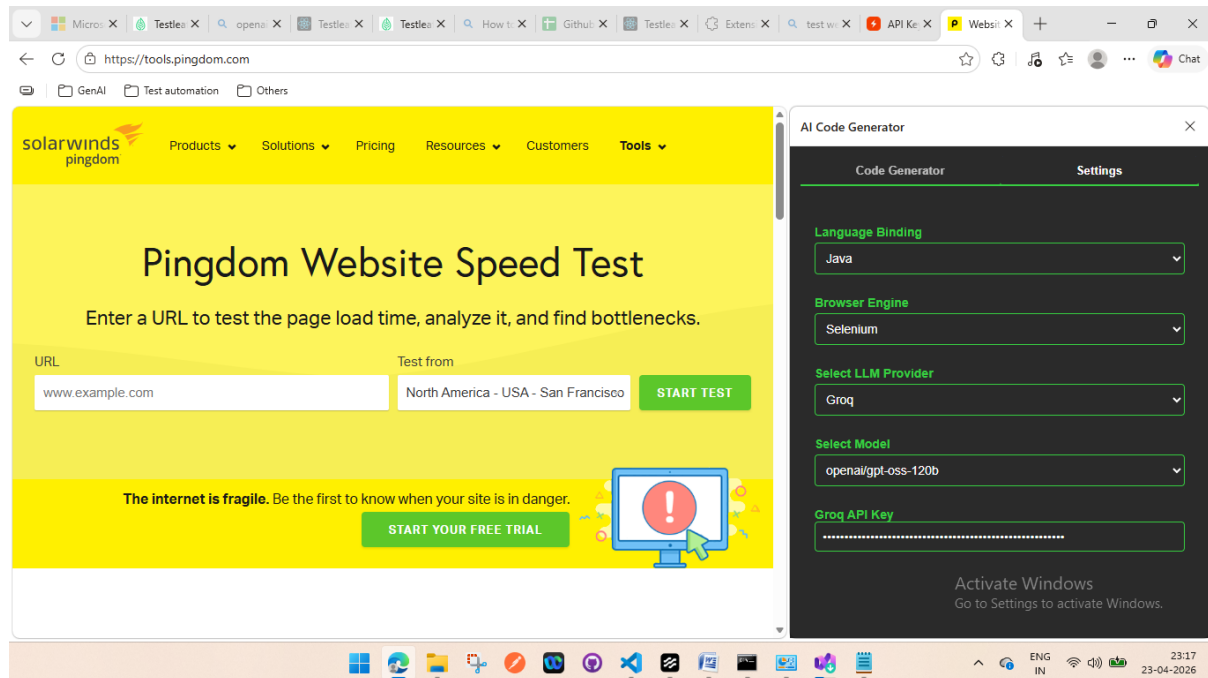

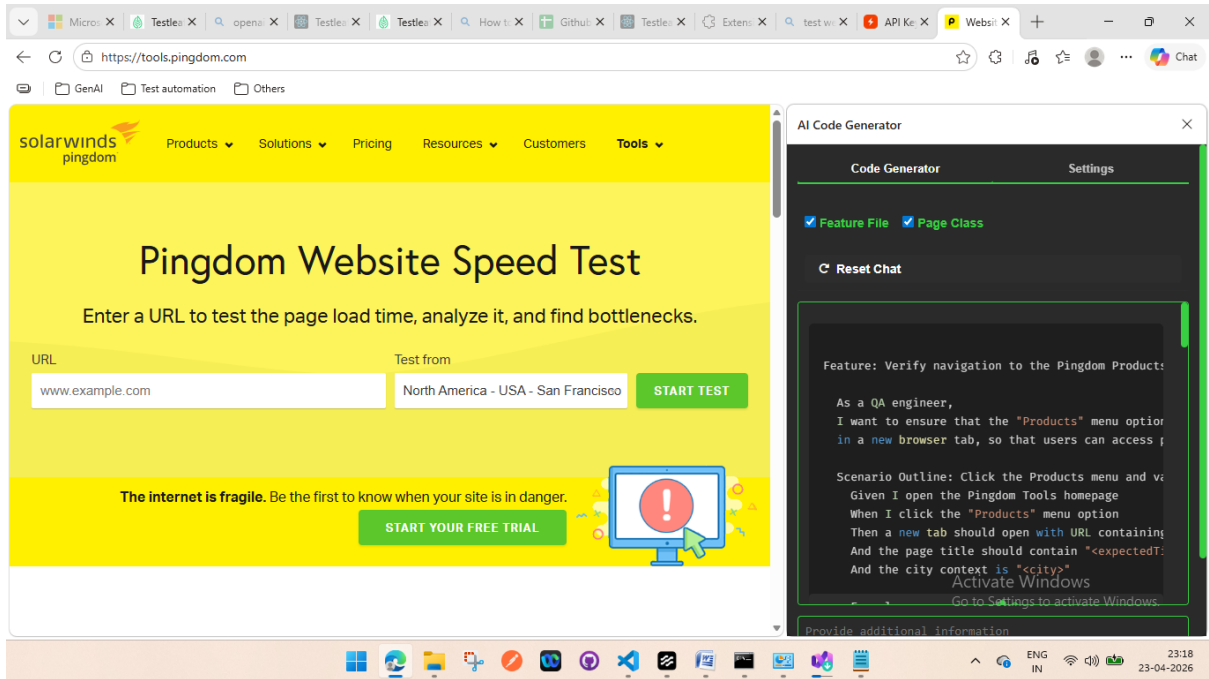

Adding testleaf LLM model name and api key from api.testleaf.com in ai extension file
