The screenshot shows the MongoDB Cloud Explorer interface. On the left, the 'Data Explorer' sidebar shows the hierarchy: Organization (Mynampati Ganesh's...), Project (Project 0), Cluster (Cluster0), Database (db_testcases), and Collection (test_cases). The main panel displays the 'test_cases' collection with 6.4K documents. A query is entered: 'Type a query: { field: 'value' } or [Generate query](#)'. The results show a list of 1024 embeddings, each represented as a 1024-dimensional vector (e.g., 388: [-0.0439453125, 0.02508544921875, ...]).

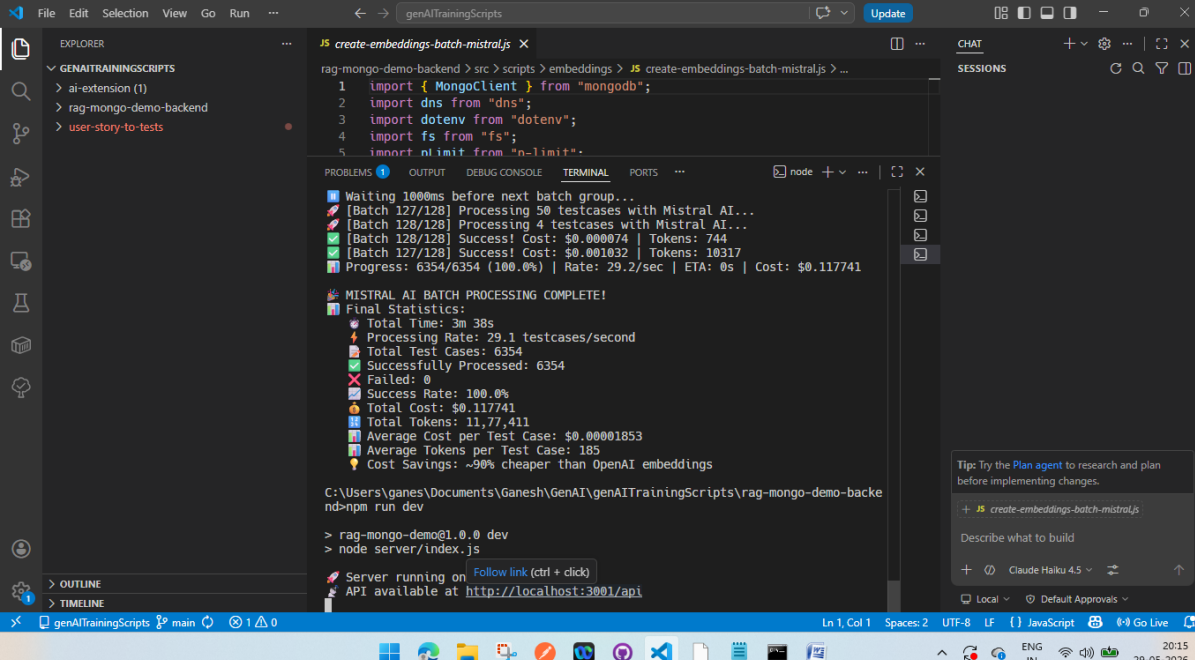

This screenshot shows the details of a single document from the 'test_cases' collection. The document is expanded, revealing the 'embedding' field, which is a 1024-dimensional vector. The 'createdAt' field is '2026-05-29T14:19:43.898+00:00' and the 'embeddingMetadata' field is an object. The interface also shows the 'Data Explorer' sidebar and the main panel with the document details.

There are total 1024 embeddings / dimensions from 0-1023 for a single test case

1024 dimension is given by mistral embed model and it differs based on embedding model. Other embedding models have other dimension value.
